T9: Change Exercise time

Status	Type	Priority	Estimate
Failed	Functional	Critical	1 minute
References	**Automation Type**		
None	None		

Preconditions

C1 Check user fitness plan.

Steps

	Step	Expected Result
1	Tap "Modify".	"My fitness plan" screen is displayed. "My details" must be visible. "My target values".
2	Tap "Exercise".	The "Exercise" screen opens. The following information should be visible: How often do you exercise? - Rarely or never - 1-3 times a week - 3-5 times a week - 6-7 times a week - Seeveral times per week

15:21

←   **Exercise**

HOW OFTEN DO YOU EXERCISE?

Rarely or never

1-3 times a week   ✓

3-5 times a week

6-7 times a week

Several times per day

WHAT QUALIFIES AS AN EXERCISE?

Exercise is a physical activity that increases your heart rate and makes you sweat. Less vigorous activities shouldn't be taken into account.

This information helps us calculate your weekly calorie requirement.

3	Change the "Exercise" time and back to "My fitness plan" screen. Example: 1-3 times a week for 3-5 times a week.	The "Exercise" should be the same as previously selected.
4	Go back to the Profile screen.	The "Exercise" now is to "3-5 times a week" and the "Target Calories" in "My Target Values" have changed. Note: For this example, the "target calories" have increased.

Results

Assigned	This test was assigned to Livia Bonifácio.
Livia B. 6/16/2019 12:06 PM	

Failed	This test was marked as 'Failed'.
Livia B. 6/15/2019 11:39 AM	**Steps** 1 Tap "Modify". **Expected Result**

"My fitness plan" screen is displayed.
"My details" must be visible.
"My target values".

---

2 Tap "Exercise".

Expected Result

The "Exercise" screen opens.
The following information should be visible:

How often do you exercise?
- Rarely or never
- 1-3 times a week
- 3-5 times a week
- 6-7 times a week
- Seeveral times per week

---

3 Change the "Exercise" time and back to "My fitness plan" screen.

Example: 1-3 times a week for 3-5 times a week.

Expected Result

The "Exercise" should be the same as previously selected.

---

4 Go back to the Profile screen.

Expected Result

The "Exercise" now is to "3-5 times a week" and the "Target Calories" in "My Target Values" have changed.

Note: For this example, the "target calories" have increased.

Actual Result

The "Exercise" has been changed to "3 to 5 times a week" successfully, but the "Target Calories" in "My Target Values" have not changed, this still shows the same amount of calories before the change.

Obs. Depending on the change in the "Exercise", the value of "Target Calories" should be increased or decreased.

(#Livia note: I always add photos to bugs if that's possible, just for you know.)
